Why Complete Tyre Solutions?

We value our business relationships and we understand that relationship is a two-way street. With a proactive, data-driven approach we can help our business partners increase efficiency and productivity, **minimising downtime and maximising profits.**

Our intelligent data systems allow us to measure and manage your tyre and rim maintenance, allowing you to unlock more value from business-critical assets.

When our clients experience tyre or rim problems our skilled technicians and fully-equipped service vehicles are available on-call to attend the breakdown and to repair or replace to keep the asset moving.

A single phone call to 1300 509 575 to dispatch a service vehicle from our strategic locations.

What makes Complete Tyre Solutions truly complete?

The company name says it all. Our business is your business.

We've built our reputation as a complete tyre service provider for over three decades, earning trust as an **independent supplier and business partner** to clients across mining, energy, civil, agriculture, transport, and associated service industries.

A Circular Economy

Complete Tyre Solutions and CTS Tyre Recycling stand as the comprehensive answer to tyre sustainability. With our dedication to eco-friendly practices, CTS spearheads the charge of **upcycling end-of-life tyres that would traditionally be buried or sent to landfills.**

Our commitment extends beyond mere recycling; we embrace **upcycling, transforming all tyre sizes, including colossal tyres from mining haul trucks,** into valuable new products such as Western Australian roads, rubber mats, playground flooring, and a variety of applications.

With the establishment of Western Australia's largest tyre recycling facility, tailored for our unique industry needs, CTS is not only offering a solution for today but is paving a sustainable path forward, **converting what was once wasted into innovative new products** that benefit our community and the environment.

ctstyrecycling.com.au

We proudly stand as the only commercial tyre group in Australia **offering a full-circle tyre economy**. We handle everything:

Supply, Service, Maintain, Repair, Recycle, and Upcycle end-of-life tyres.

We don't just recycle tyres; our speciality extends to all rubber products, including conveyor belts, mill liners, , and marine fenders, contributing to a greener, more sustainable future with our world-leading OTR/mining tyre recycling facility.

24/7 BREAKDOWN SERVICE

Day or Night, Always Ready, Always Rolling! Complete 24/7 Tyre Solution.

The 24/7 Breakdown Service by Complete Tyre Solutions offers an around-the-clock response to tyre-related emergencies.

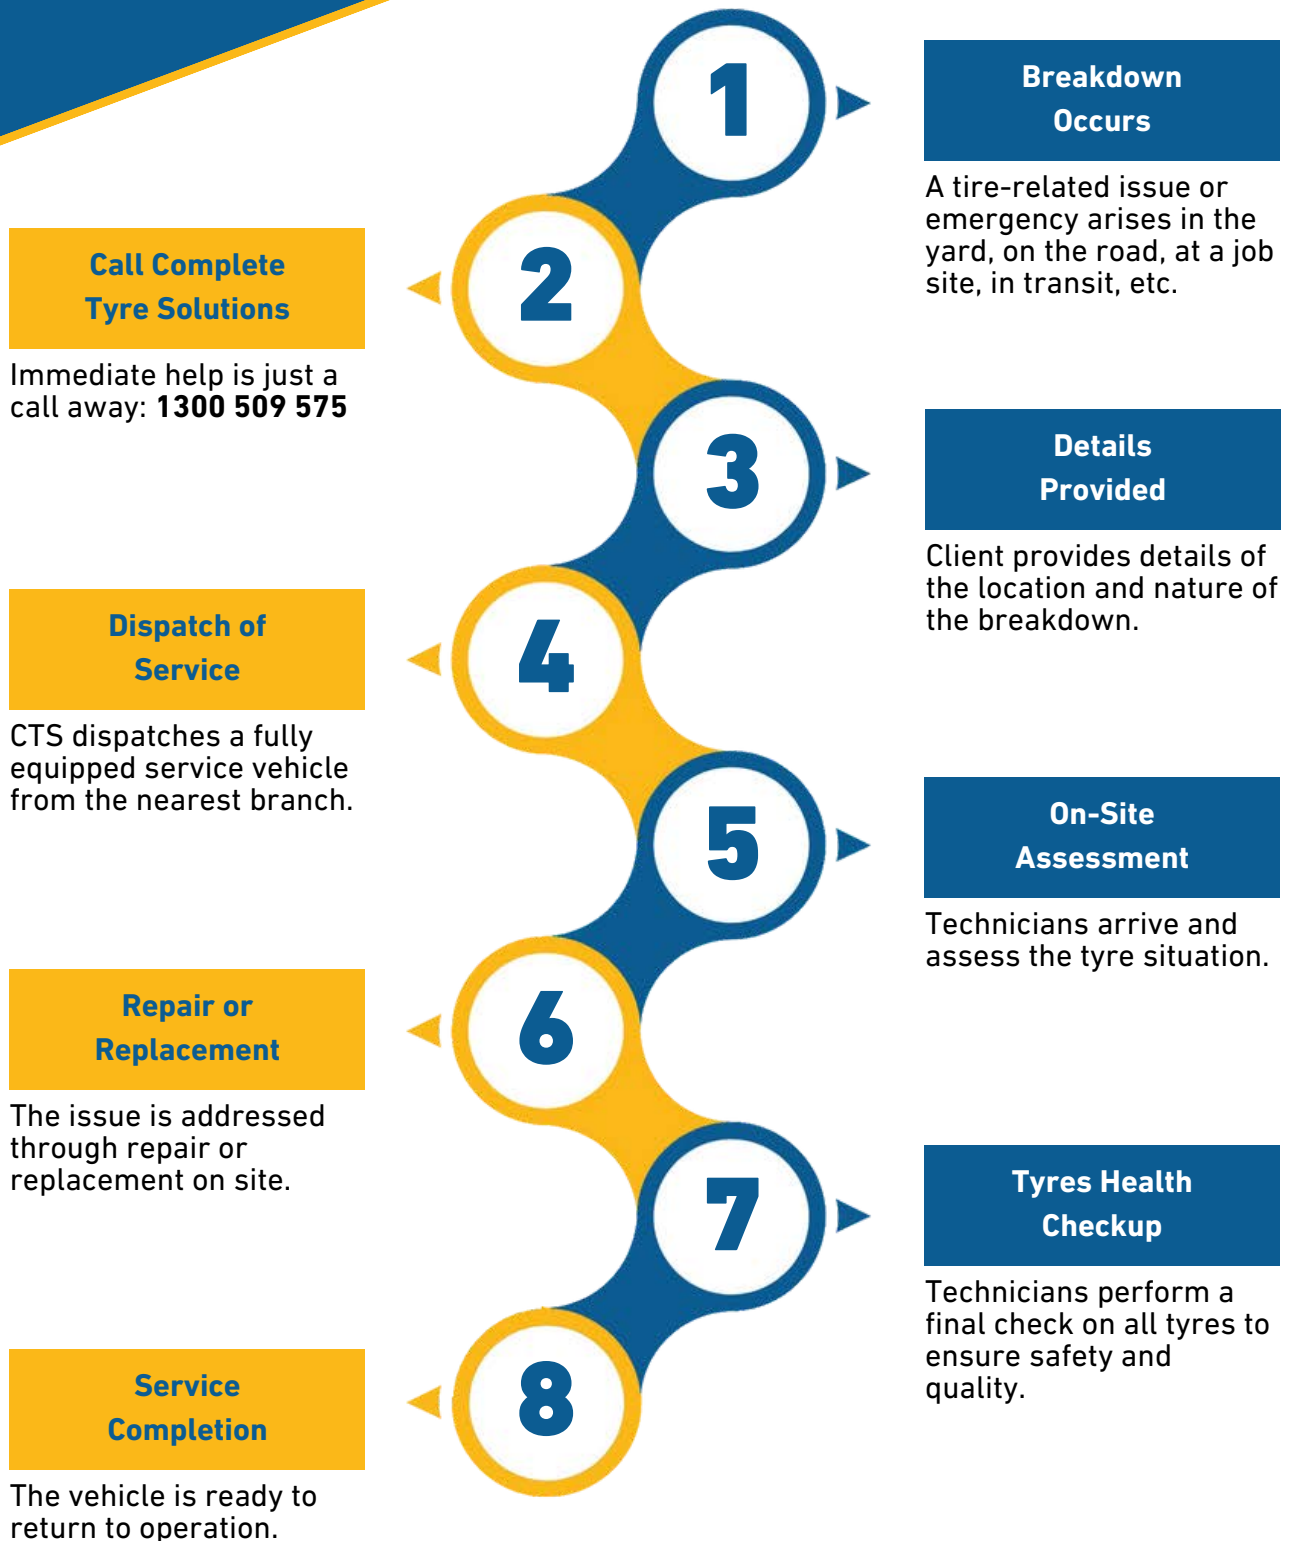

This service is designed to **minimise downtime and ensure continuous operation for vehicles**, especially those in critical sectors like transport, logistics, mining, energy, civil, and agriculture.

With 13 strategic locations (across WA, NT, and SA) and a fleet of fully-equipped vehicles, CTS ensures swift and efficient **on-site tyre repair or replacement, any time of the day or night, including public holidays.**

This service underscores the company's commitment to reliability and customer support in urgent situations.

- Round-the-Clock Availability
- Minimised Downtime
- 13 Strategic Locations
- Fully Equipped Vehicles
- Expert Technicians
- Emergency Tyre Replacement
- Adaptability to Various Vehicle Types
- Cost-Effective Solutions

How it works

ON-SITE TYRE MAINTENANCE

Your Location, Our Service: All Size Tyre Maintenance at your Doorstep.

On-Site Tyre Maintenance service is an all-encompassing solution that accommodates **every tyre size within your fleet, from the smaller tyres on vans to the colossal OTR (Off-the-Road) tyres on haul mining trucks.**

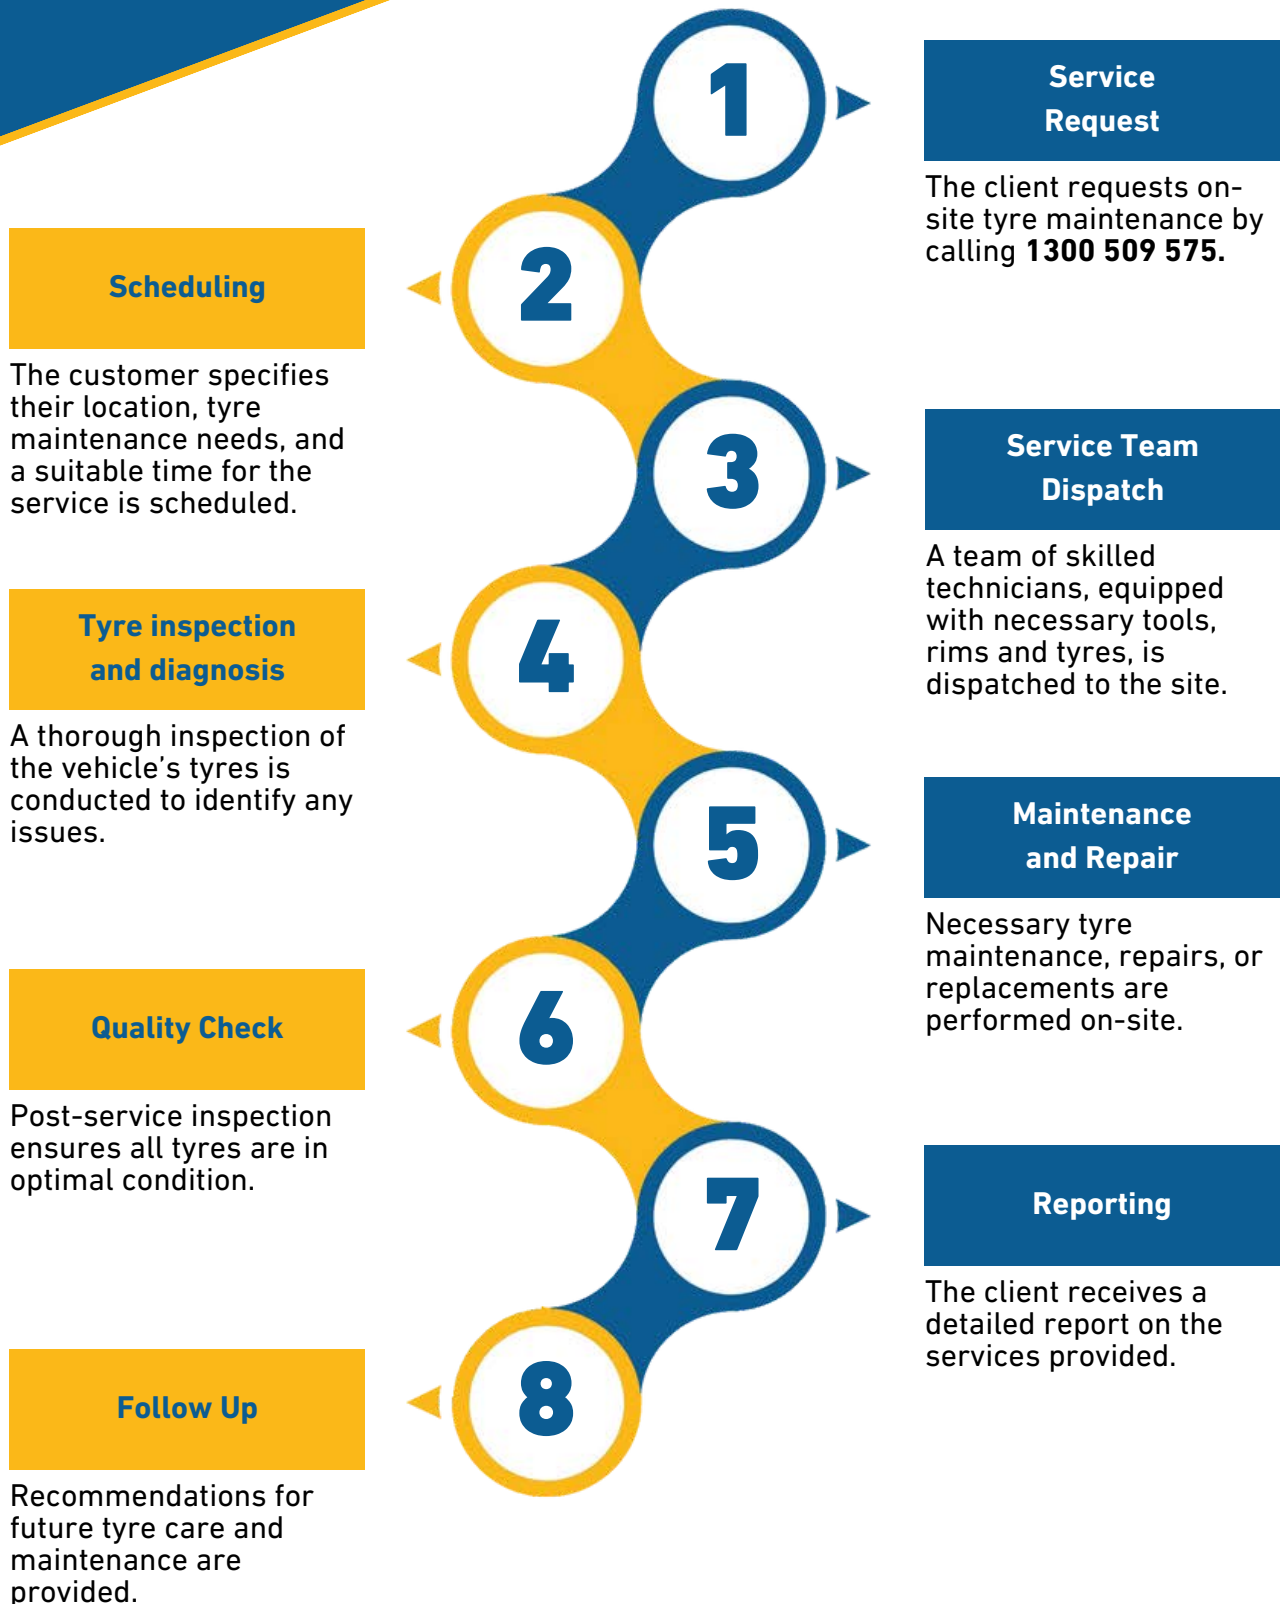

This service delivers our skilled technicians and state-of-the-art equipment right to your location, ensuring that **whether you're roadside, on a job site, or at your facility**, your tyre needs are met promptly and efficiently.

With a focus on minimising downtime and maximising tyre life and safety, **our on-site service is tailored to maintain and repair tyres of all sizes**, ensuring your fleet remains operational and efficient at all times.

This adaptable service is ideal for businesses seeking comprehensive, hassle-free tyre maintenance for their diverse vehicle needs.

- All Sizes Tyre Maintenance
- Adaptability to Various Vehicle Types
- Reduced Downtime
- Fast Response
- Compliance with Safety Standards
- 13 Strategic Locations
- Fully Equipped Vehicles
- Expert Technicians
- Emergency Tyre Replacement
- Cost-Effective Solutions

How it works

FLEET TYRE MANAGEMENT

Maximum Efficiency on Every Tyre.

Our Fleet Tyre Management service combines **comprehensive tyre care with smart financial management for fleets of any size.**

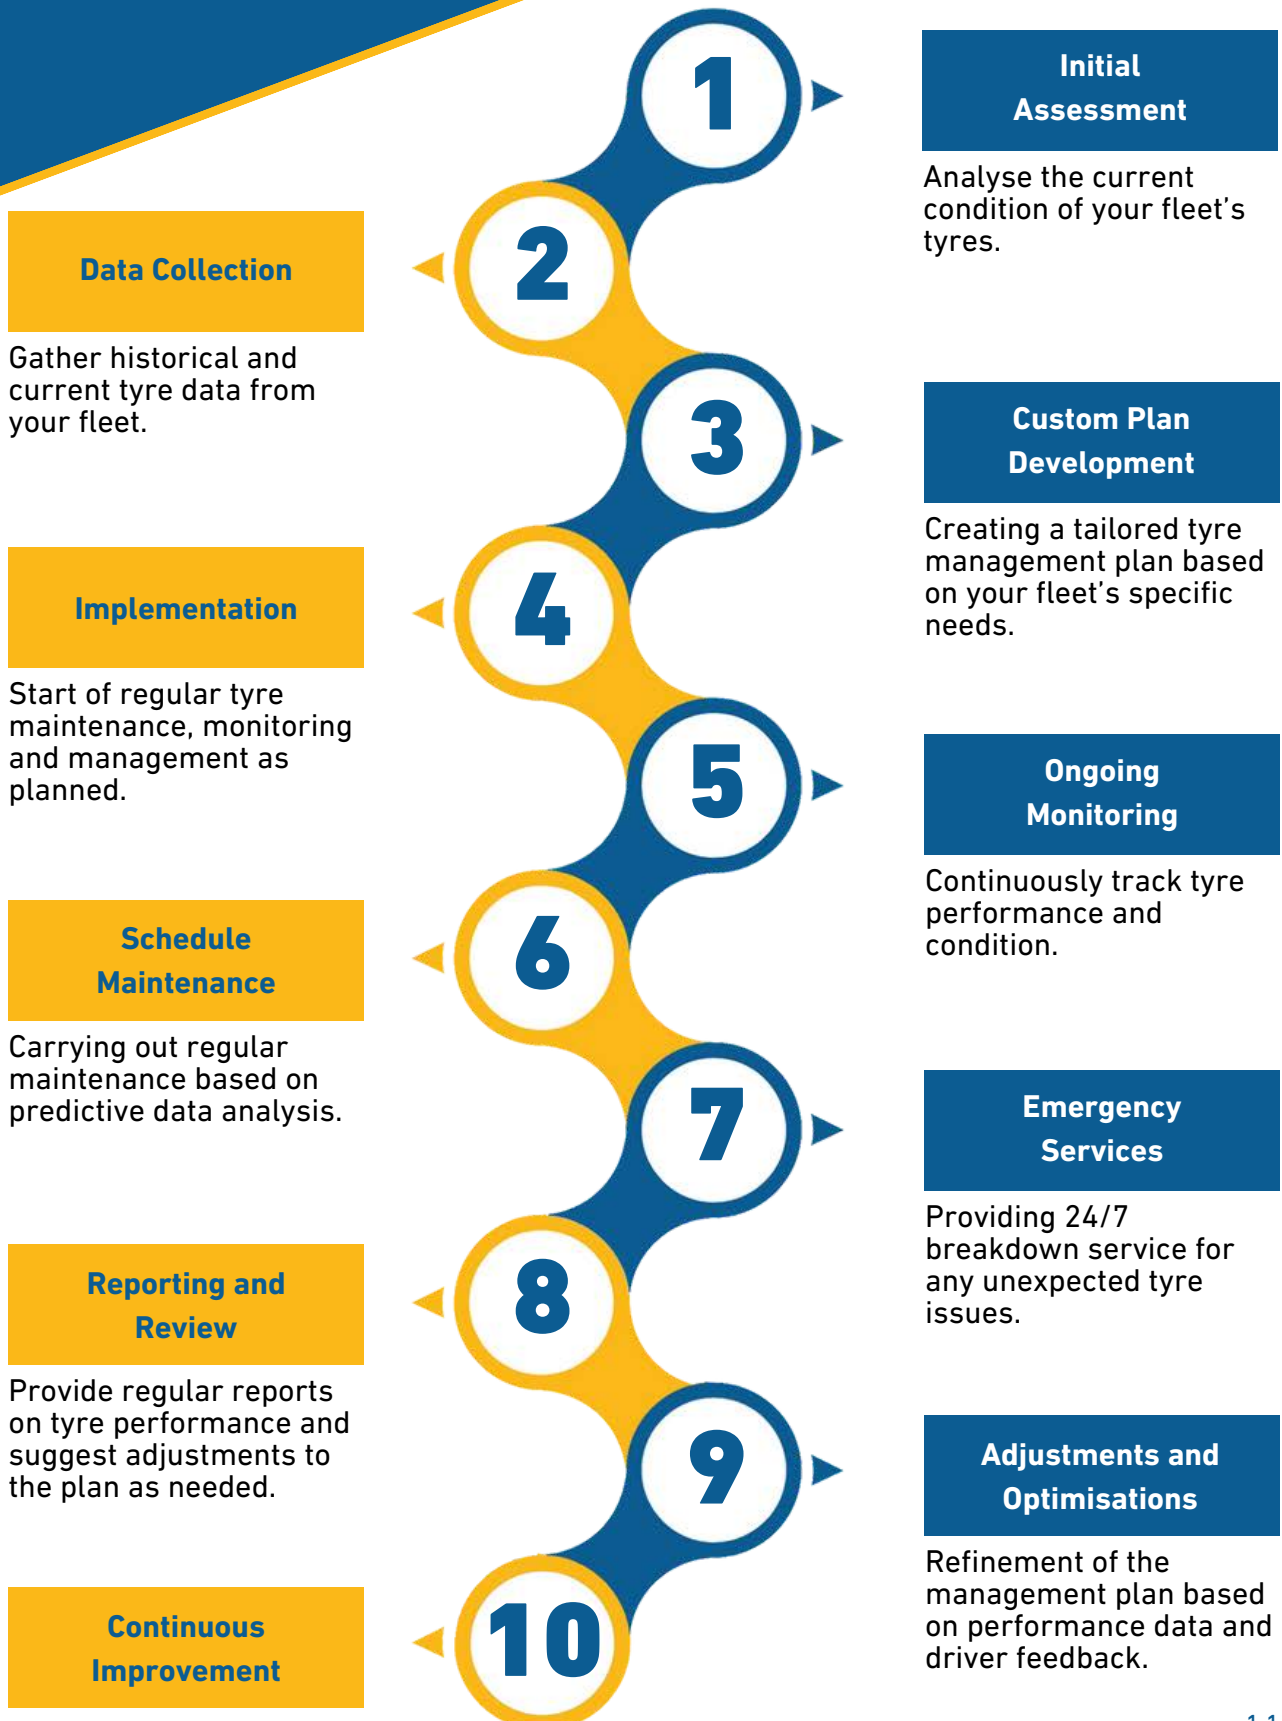

This service not only involves regular monitoring, maintenance, and replacement of fleet tyres but also employs advanced **data analytics to predict wear and optimise maintenance schedules.**

This approach allows for effective cost control, **reducing unexpected breakdowns and ensuring operational efficiency.**

It's an invaluable asset for any business, ensuring that managing your fleet's tyre expenses is never a guessing game but a well-planned strategy.

- Data-Driven Decisions
- 24/7 Breakdown Service
- Reduced Downtime
- Longevity of Tyres
- Safety Enhancement
- Comprehensive Reporting
- Increased Fuel Efficiency
- Tyre Expenses Predictability

How it works

TYRE RECYCLING

The Circular Economy: Supply, Maintain, Repair, Reclaim, Recycle, Upcycle.

Our Tyre Recycling Service embodies a commitment to sustainability and environmental responsibility. **We stand out as the only commercial tyre group in Australia that offers a Full Circle Economy for tyres.**

Marking a first in Australia, **CTS Tyre Recycling** will have the unique capability to recycle tyres of all sizes, **including the massive haul truck tyres used in mining operations**, which are currently buried at the end of their life.

We're not just about tyres, **we specialise in recycling all forms of rubber, such as conveyor belts, wetsuits, mill liners, marine fenders, and much more.** Our state-of-the-art facility, located in Neerabup WA, is equipped to transform any rubber product into valuable, reusable materials, supporting a more sustainable and environmentally friendly future.

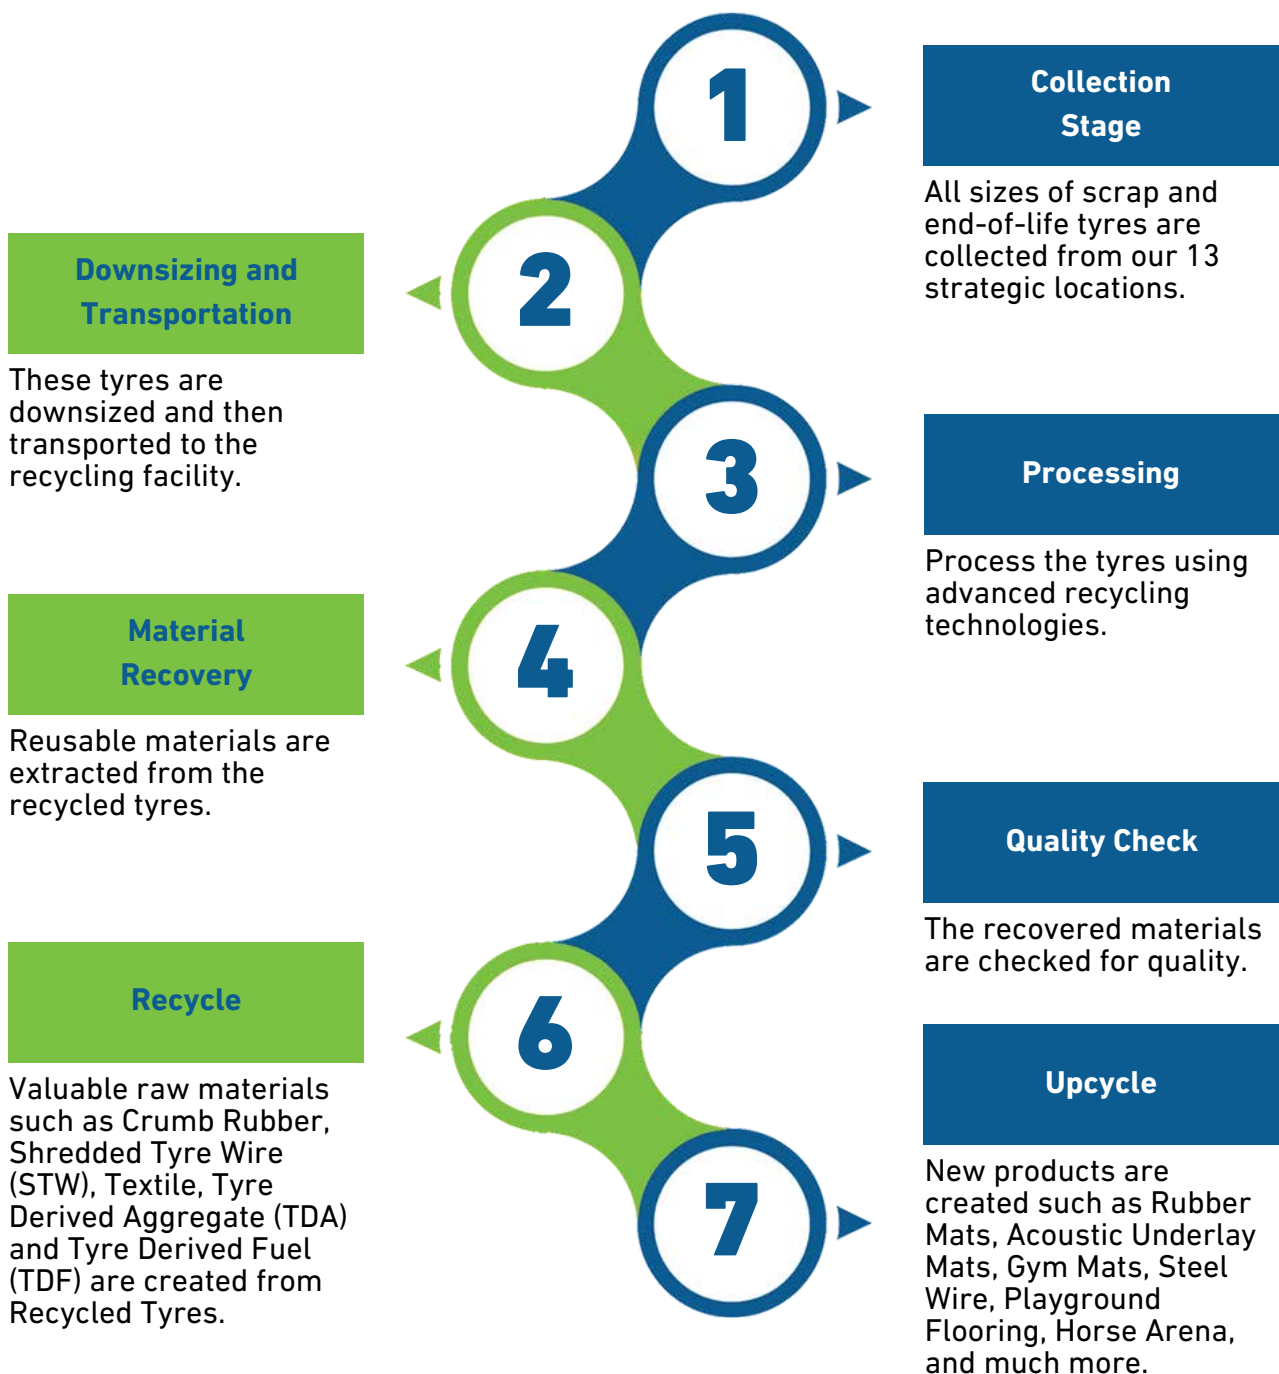

- Convenient Collection
- Tyres downsizing and Transportation
- State-of-the-art Facility in Neerabup WA
- 13 Strategic Collection Locations
- Commitment to Eco-Friendly Practices
- Support for Circular Economy Principles
- Business Responsibility
- Long-term Environmental Health
- Cost-Effectiveness
- Regulatory Compliance

How it works

The Circular Economy

upcycle
(up-cy-cled, up-cy-cling)

verb (used with/without object), to process used goods or waste material so as to produce something that is often better than the original: "I upcycled a stained tablecloth into curtains."

INDUSTRY FOCUS

Mining & Earthmoving

With high value assets, it's essential to have the right partner to work alongside your business. CTS has a customer-first focus, including dedicated On-Site Tyre Management and Cost Per Hour measurement.

Our specialist teams ensure you minimise downtime, maximise safety, reduce overall costs and predict tyre wear to allow you to plan scheduled maintenance around low productions times.

Truck & Transportation

Tyres and rims are the lifeblood of any road transport and logistics operation.

Our industry experience will support your business, bringing the correct replacements and the right tools to get the job done first time.

With experience across the industry, we know your vehicles and we know you need them back on the road, fast.

Material Handling

There is a lot at stake with materials handling equipment; your staff, the public, the equipment, and the payload. Our experience and understanding spans all sectors of materials handling from forklifts to floating deck and rough terrain cranes.

Our specialist knowledge also extends to understanding and maximising cost effectiveness, with life-cycle monitoring to plan and deliver scheduled maintenance to avoid costly breakdowns.
